

Application of: Takeshi Yamada, et al.  
Serial No.: Not yet known  
Preliminary Amendment

REMARKS

Applicant is filing a U.S. National Stage Application based upon PCT International Application PCT/JP2005/002041 filed February 10, 2005. This application claims priority through Japanese Patent Application No. 2004-035357. An English translation of the International Application is included herewith. Because original claim 4 has a multiple dependency, this Preliminary Amendment amends claim 4 to remove the multiple dependency and also adds new claims 5 and 6. Applicant has also added three paragraphs to the Specification as indicated in the Amendments to the Specification set forth herein on page 2. The Abstract has been amended to reduce the word count to the required 150 words or less.

If the Examiner has any questions regarding this Preliminary Amendment, it is respectfully requested that the Examiner please telephone Applicant's undersigned attorney in this regard.

If any issue regarding the allowability of any of the pending claims in the present application could be readily resolved, or if other action could be taken to further advance this application such as an Examiner's amendment, or if the Examiner should have any questions regarding the present amendment, it is respectfully requested that the Examiner please telephone Applicant's undersigned attorney in this regard.

Respectfully submitted,

Date: \_\_\_\_\_
